

# A revolutionary *back pain solution* has arrived!

If you've ever had back pain, you know firsthand its debilitating nature. What was once a full, robust and active lifestyle can quickly turn into agonizing daily pain and a diminished, often demoralizing, lifestyle.

## 4 reasons for choosing My Spine Treatment Center

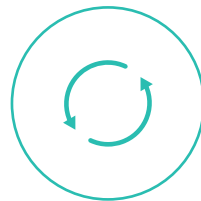

### Simply Safer

This hour-long procedure results in less pain and a quicker recovery time. It is a minimally invasive, same day, simply safer experience.

### Post Fusion Option

The My Spine Procedure can alleviate pain and stress caused by fusion or discectomy surgery to the adjacent levels to the spine.

### Fully Reversible

Designed to last a lifetime, this advanced, reversible technology allows for continuous access to future spine treatment upgrades.

### Affordable

Significantly less expensive than traditional surgery or ongoing back pain management. My Spine represents a better solution at a lower price.

# Our innovative solution is *The My Spine Procedure*

## What is it?

It is a same day, minimally invasive surgery that promises to get you back to your active, pain-free lifestyle in days, not months.

The My Spine Procedure uses a revolutionary lower back implant called The WELLEX, which is developed and made in Switzerland.

## Treatment

The WELLEX moves with the body, adding support to the spine's natural movements. Designed to last a lifetime, it also has the added benefit of being able to be removed without causing any lasting damage to the spine so that new, more advanced, future technology can be implanted if the need arises.

## The Recovery

- ✓ Immediate and long-term pain relief.
- ✓ Same-day treatment followed by a significantly quicker recovery.
- ✓ Greater long-term mobility and stability.
- ✓ No fusion or loss of mobility
- ✓ Adds stability to your spine.
- ✓ Diminished likelihood of recurring back pain.

## Our Facilities
